Al-Nayzak

Scientific technological Lab Project

In Partnership with Alnyzak Association , Human Supporters Association got a Computer Lab its include: computers and tables and chairs.

According to this new project, we started extend two rooms for the new lab, the use of the lab will be to teach the students of the schools and university new computer programs, develop their computer skills, hold some of workshop about " how to use the computer and internet" for the children and women, as well to use it for scientific and technological aims we hope to use in the best way for the society.

Renovation of HSA project

Human Supporters Association started implement some of construction inside its center in the middle of August, some of the rooms merged and expanded, such as library room and computer lab.

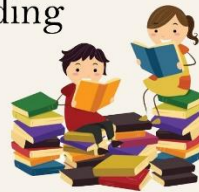

The aims of this change is: develop its work and create new environment to feel more comfortable and give motivations during the work, achieve its goals, hold new programs and activities for children, youth and women.

Human supporters Association started develop its library by create a big and calm room in its center, also developed the system of borrow the books, stories and archiving a large number of books with a lot of topics.

The aim is creating a comfortable and calm place for reading, develop reading skills, enhancing reading for children and youth.

School bags Project

HSA prepared "school bags project" for children aged 7-12 years old, it will distribute for children before the school start in the beginning of September, we target the children from low income families, and try to help them especially during this period, because the economic situation is declining because of the emergency and lockdown in Nablus city.

The bags include some stationary such as: notebooks, pencils, sketchbooks pen, hats and winter gloves.

We wish to the children the success in their school, and we thank all the donors for their support of this project.
